

Company Profile

Since 1993, M-Focus has specialized in providing IT solutions in "manufacturing and materials management" and has developed expertise in MRP II (Manufacturing Resource Planning), ERP (Enterprise Resource Planning), CRM (Customer Relationship Management), and APS (Advanced Planning and Scheduling). Today, we have expanded our solutions into the Transport Planning and Logistics Systems, including B2B e-Commerce.

Our expertise has allowed us to help our customers implement systems that cover the management of manufacturing, financials, sales and customer support, and distribution activities. Our customers range from SMEs to large manufacturing and distribution firms that include firms in auto-parts, tools, electronics, printing, textiles, cosmetics, medical devices, food, rubber, rice, pharmaceuticals, and consumer goods.

M-Focus employs quality people with knowledge and skills in business management, accounting, industrial engineering, computer science, computer engineering, information technology, economics, management science, and operations research.

Providing Advanced ICT Solutions in Manufacturing and Logistics.

Implementation Consulting Services

M-Focus consultants are industry experts with years of business experience and in-depth knowledge of their particular field of expertise, including Manufacturing, Distribution, Accounting & Finance, Thai Taxation System, Business Intelligence, Logistics Planning and Scheduling, Supply Chain Modeling, Simulation, and Optimization.

These skills combine to form powerful and effective software implementation resources. M-Focus provides on-site services for training, implementation and consulting. Our proven methodologies eliminate the trial-and-error method of implementation, ensuring that your solutions are implemented efficiently and in a timely manner. Armed with more than 15 years of implementation experience and product knowledge, our team is a valuable asset to your company's implementation success.

Company Objective

It is M-Focus' primary goal to become the leading systems integrator for manufacturers and distributors in Thailand and beyond. M-Focus is committed to providing the highest quality service and solutions for companies engaged in manufacturing, production and distribution of goods and services. M-Focus' strategy is to provide the best information management solutions and value to support strategic, tactical, and operational excellence for our customers, thus making our customers competitive in their business.

M-Focus strives to understand customer requirements and provides customers with the best solutions and services using qualified trainers and implementers. This allows customers to benefit from our extensive experience in implementing a diverse variety of solutions.

Bring your company's future into focus.

Customer Support (CS)

CS is a technical resource for servicing your needs when we are not on site. Available through telephone, fax, e-mail, and on-line web-based assistance, our customer support services ensure that your requests and concerns are effectively communicated to us and handled by appropriate personnel at M-Focus. M-Focus provides both normal and emergency services, depending on individual customer's support program. Normal customer service is provided during regular business hours with a team of full-time officers taking your calls and responding swiftly to your inquiries. The team is supported by a knowledge base, a team of consultants and programmers, as well as access to technical documentation via our software supplier extranets.
