Aptean Intuitive ERP

Enterprise Resource Planning for Discrete Manufacturers

Aptean Intuitive ERP gives discrete manufacturers greater visibility into all areas of their business. With end-to-end support for your production, inventory, financial, quoting, and support processes, Intuitive streamlines your operations and helps you identify opportunities for cost savings and efficiency improvements. And with Intuitive's user-friendly business intelligence features, you can access key information when and where you need it for faster, more accurate decision making.

Seamless Integration of Critical Data

Intuitive provides complete quote-to-cash functionality, allowing you to seamlessly integrate critical data across your enterprise, from daily operations to the strategic level.

Intuitive provides:

- **Enterprise Resource Planning (ERP)** – A flexible toolset supporting all of your operations, including forecasting, master scheduling, engineering management, inventory management, quality control, quoting, finance, and more.
- **Customer Relationship Management (CRM)** – Manage customer information, opportunities, marketing campaigns, and support incidents on a single platform while ensuring alignment with the financial and order processing data in your ERP.
- **Business Intelligence** – Access the critical business information you need for fast, informed decision making. Monitor performance, identify trends, display KPIs, and easily configure reports based on your specific requirements.
- **Extended Enterprise** – Seamlessly support operations at a single location, multiple plants, or across international borders. Leverage multi-currency capabilities, full support for VAT taxes, and translatability into any language at the user level.

Benefits

- Improve quality and regulatory compliance
- Maximize the efficiency of your sales force
- Support multi-national operations
- Visualize key business information quickly and easily
- Eliminate workarounds and streamline your operational workflow
- Reduce IT labor and costs with an open architecture based on SQL database and VB.NET

Key Features

PLANNING
Analyze material requirements, react to scheduling issues, and make accurate delivery commitments with dynamic available-to-promise (ATP) and capable-to-promise (CTP) tools.

ENGINEERING MANAGEMENT
Create visual bills of materials, generate and maintain flexible routings, track engineering changes, and manage product lifecycles.

INVENTORY MANAGEMENT
Control inventory transactions, product costs, and material usage, and track material location/lot information and multi-level serial numbers cradle-to-grave.

DEMAND FORECASTING
Generate forecasts automatically– or leverage the system's diagnostic tools and models to generate forecasts yourself.

QUALITY CONTROL
Support complete inspection procedures – from raw materials, to work-in-process, to customer returns.

INCIDENT MANAGEMENT
Create detailed records of support incidents, calculate costs associated with resolution, track warranties, and manage service contracts.

Additional Capabilities

- **Shop Floor Data Collection** – Implement barcoding to automate entry of data from receiving, shipments, inventory transactions, labor reporting, label generation, and RFID, improving accuracy and efficiency.
- **Aptean CADLink** – Eliminate redundant data entry and streamline product development by integrating Intuitive with your CAD design system. Supports SolidWorks, Solid Edge, Autodesk Inventor, and more.
- **Advanced Quality by uniPoint** – Track the cost and frequency of quality events, initiate non-conformances and corrective preventative actions, manage maintenance for ISO compliance, and track HazMat documentation so you're always prepared for an audit.
- **Aptean Analytics for Intuitive** – Discover and share business insights with pre-built dashboards and reports that provide insights into your operations and drill-down intelligence into KPIs and root causes.
- **Aptean Event Management Framework –** Enhance communication with customers, vendors, and internal staff by automating routine and exception-based email and text message notices. Email Intuitive to "ask" a question while on the road and get real-time status for a customer, vendor, or order.

aptean

Aptean provides very specific industries with very specific ERP, supply chain management, and customer experience solutions. In today's fast-paced, highly competitive economy, organizations don't have time to waste forcing homegrown software, spreadsheets, and one-size-fits-all solutions to do things they were never designed to do. Aptean is on a mission to end those workarounds – with industry-specific solutions instead of generic software, expert support instead of making you go it alone, and a steady influx of new ideas instead of the status quo.
